

## Single Slot Ethernet and Four-Slot Charging for MC9300

Portsmith offers two docking solutions for the Zebra MC9300 family of handheld computers.

The Single Slot Ethernet Dock provides 10/100 Mbps data connectivity via rear RJ-45 port. No special drivers are required, and the handheld charges while in the dock.

The 4-Slot Charging Dock provides 4 handhelds with safe, regulated charging.

Both units are designed for durability with ultra-rugged steel bases and ABS interface cups.

### Power On Full Time

- Always on power and charging
- Power supply included
- On-board over-power protection

### Built For Enterprise

- Rugged ABS cradle elements
- Steel chassis structure
- Portsmith's renowned quality
- 1-year warranty

### Specifications

- Ethernet connectivity in single-slot only
